gists, 100 Fulton st. corner of William, N.

T is now about ten years since this medicine has been introduced to the public and it stands unrivalled in its effects, bear in the severe test of the scrutiny of all class. es, both friendly and unfriendly. It is but for one purpose-for the use of Mothers, who have to pass through a sea of affliction in giving birth to mankind, not to be described. It is to you, we make appeal. It is for your general and special good that you should make use of one bottle of the MOTH-ER'S RELIEF before confinement, then you can approach the paturient chamber without feeling as if you were going to the hamber of death. You may rest assured that it will still all febrile and nervous af fections. It smooths and shields from irritation, and by its peculiar properties, it des troys the cause of hemorrhage or inflamation that so often attends and follows the hour of parturition. It causes sweat and natural rest, and at last facilitates the birth so that mothers will not have to pass thro such excruciating pain and distress. The mothers relief may be depended upon in all cases of threatning abortion, where it is possible to be prevented; in cases of spasms &c., causing frequent starm, from two to

three doses will give immediate relief. As the subject is one that cannot with propriety be fully discussed in this public man ner, we invite all who feel interested to cal n our agents (most of the respectable drug gists in the United States.) or on the manuacturer, and they will be formshed with a pamphlet in which they will find all the facts o form a correct opinion of its merits, and also the opinion of many physicians of emi-Printers of newspapers, who publish this nence, and of persons who have become ac-

CONVERSATION BETWEEN TWO FRIENDS, ABOUT BRANDRETH PILLS.

Question .- What is the best time to take Brandreth Pills, so as to get the full effect from a dose whether large or small?

Answer.—To take them on an empty

stomach, or at night going to bed, as they seldom operate before morning. Q .- How soon may a man eat, after taking

A .- Directly. But it is better to wait an our or so, and in fact, the less that is eater he better, until they have begun to operate Then eat what you like-a bastn of soop is lowever the best thing you can take

Q -Will any legacy be the consequence of taking a meal immediately after a dose of

A .- No. But the pills will neither act so

pleasantly, nor do as much good. Because when food is put right upon them, their vital forces on the morbid matters of the body are somewhat reduced—some of these forces being necessarily absorbed by the digestive process.

Q .- Suppose you want to use Brandreth Pills as a dinner pill, you must in that case take one or two immediately preceding dinner, so I have heard, and in fact have known dyspentics to use them, and beneficially How can you make the rule work bott

A. - The Brandreth Pills, if taken immedi ately before a meal, accelerate digestion when used as such, they are used as pallia fives, and are of the most essential service in aiding the assimilating functions, in producing the incorporations of food into various tissues of the body. But the question was, how is the greatest amount of purgation derived from the pills ! The answer was, or intended to be, by taking them on an empty stomach; but for the purpose of ma-

the metter more plain to you, I will . Dr Brandreth. 'I find that it is better to let the digestion be nearly completed before the pills are taken into the stomach --Suppose a hearty supper has been taken then take them after the first sleep; or an bour or so before breakfast. If breafast has been eaten, then in two or three hours afterbeen eaten, then in two or three hours afterwards of dinner has been taken it is well if wards; if dinner has been taken it is well if the circumstances will permit, (for whenever serious sickness is present, down with the lungs of 9 years around a complete and perfect pills, if it is in the middle of a meal, there is never no danger from their presence) to wait for 4 or 5 hours before a dose of the pills is taken. Let it be understood, that in all cases, it possible, they should be used on an empty stomach. The pills will always have a better effect. Not but that they should be used on an empty stomach. The pills will always have a better effect. Not but that they are perfectly safe at any time, they are so.— The object is to insure the greatest amount of good and thus is accomplished by taking them on a empty stomach. Because the object is not to see celerate digestion, but to remove the cruditles burn the blood, and the pills always passing into the blood do so more easily and with greater, comfort to the body, when the stomach has nothing to oppose the in their passage through it to the first intestines and so into the circulation. For when the pills are swallowed, they first pass into the stomach having been dissolved there, next pass into the small intestines, from whence the factuals suck them up and pass them along, with a portion of chale, int the voins first, and afterwards into the arteries — I suppose they (the pills) impart an extra power to arterial blood to deterge morbid matters whorever it may find them, and also passing such merbid mat-ters from the arteries to the years which bring then, to the liver pancreas, and knineys, in couse quence of which these organs become more vicin-ous in their secretions, and expel not only the cru-dities which have been thrown into them from all parts of the bodey, but also those which they them-selves contained previous to this collection of cro-dities or impore matters by the pills. These crudities or impure humors or matters, are discharged in the bowels and is being accomplished when feel that filling up of the howels which warr they are about being moved. This feeling This feeling takes place in health only to a less extent, torit is the same principle that moves the bowels to discharge their contents, and these acids or and homors are provi-ded by nature for this very purpose—that of produring the alvine evacuation they are in too great a quantity that disease is produced. The Brandreth Pills bring these humor from all parts of the body to the bowels, which visitera is excited by their presence and so occasion their expulsions but of the body. Thus it is see their expulsions out of the body. Thus it is see that the pills lose their individuality after bein

dissolved in the stomach and the purgation is sole from the effect produced by the cleaning the bleo receives of its impurities."

Q. According to this the pills only occasion pur ging making the blood to tree itself of its impurities

A You have it exactly. They simply assist na-re to do her own work in her own way, and in her own time. O! then you believe them to be always spo! de in case of suckness. How can you make that

A I prove it this way. If suckness can only ef-fect the body, when the vital principle is below the healthy standard, I know, and any one will allow, that when the treatthy principle is restored full there will be no discuss.

Q But suppose the sickness was the result of a fall, would the Brandreth Pills cure them?

A No other medicine in the world will restore health so queck as the Brandreth Pill, whether was lost by a fall or by breathing contagion. In case of a fall, or blow they are highly necessary, because we may suppose there is congulated blood and lympl deposited in the region of the affected part—if inter-nally it will be dangeraus for it to remain, if exteris unsightly at least. In either case, a few

of Brandreth Pills will prevent all danger by leting a cure. I have seen them used in this a hundred cases, and have never known them

In fact they cannot.
It is usual to bleed in case of falls, Q. It is usual to bleed in case of fails.

A Brindreth Pails do what bleeding can do, so fir as relieving the circulation. But Brandreth Pails do more, they take not these parts from the blood only which are dead or impure—while bleeding takes not the healthy parts also. After Brandreth Pails, a man is stronger—after bleeding. 's Pille, a man is stronger-after bleeding.

weaker.

Q. How stronger !--impossible! Do not Bran-deth's Pills purge? How can a sum be stronger from taking a purge, --from depiction--for it is ce-pletion just as sorely as bleeding--how then can a man be stronger!

A. I admit ordinary purges weaken, the purge-

eyes of your physicians all other purgatives save only Brandreth's Pills. They do not weaken, they i ngthen and in two ways. Piretly by taking out of the blood those matters which held, as it

the life principle in custody and accountly, he imparting a toole or life giving property to the blood Q. Then you do not suppose their continual use as an anti billour pill or otherwise would injure?

A lojure — Goodness: Every dose you take will make you stronger in every way. Injure! Why I know one pentleman living in the city of New York who took them every day for five years for constitutional costiveness. He had not for 10 years previously ever had a stool without using medicine or an injection, and overly very he was confined to his bed three or four months. For five years he took Brandreth Palls. And why? Because he found his because he found his bowels become stronger and stronger from their user and from all other purgatives he had taken they become weaker and washer. In fact he found that at first he required six eight and ten pile to produce an operation but to a year four pills man, of Buffain, one Dr Smith of NewYork, also Comstock of N. Y., his bottles and out. seaturation. Finally, he become as healthy as any

PULMONARY ORGANS, A very important disease over which this Balsam exerts a powerful influence, is that DISEASED LIVER.

In this complaint it has undoulsedly proved more officacions than any remedy hitherto employed, and in numerous thatances when patients had endured long and severe suffering from the disease, without receiving the east benefit from various remedies, and when Mercury has been resorted to in vain, the use of this Balsam has restored the Liver to a healthy action, and in many instances of ected PERMANENT CURES, after every knewn remedy had failed to produce the destred effect.

Opinion of a regular Physician, Exeter, Me., Sept. 30, 1815.

This certifies that I have recom he use of Wistar's Balsam of Wild Cherry for diseases of the Langs, for two years past, and many buttles to my knowledge have been used by my patients, all with beneficial results. In two cases where it was thought onfirmed consumption bud taken place, the Wild Cherry effected a cure.

E. Boydes, Physician at Freter Carner. NO QUACKERY: NO DECEPTION: Beware of Counterfeets and Immutions .-The unparalleled and asternishing efficiery of Dr Wistay's Raisam of Wild Cherry to all diseases for which it is recommended, curing many cases after the short of the best wound or sore twice a day divstrians was unavailing, has effected a wounds wet a rag in the Oil, and bind it large and increasing demand for it. FIFTY THOUSAND DOLLARS Paid for the Original Recipe of the CELEBRATED LINIMENT OF ST. JOHN LONG.

THIS most wonderful remedy of the late St. JOHN LONG, of England, for the external application to many diseases, is now or the first time introduced into the face The great tame of this most important me

icine has preceded it, as will be seen by the following extract taken from the Medical la-

telligencer, vol. 2, page 192. It is here

troduced to show the public, the great exmation in which St. Long's Limment was held, not onlyby the people of England large, but also by the Medical Faculty than "Dr. Macreight called the attention of the Medical Society to the composition of the Langment employed by the celebrated s John Long, which at one time, excited small controversy with respect to its imput virtues. It was known to most of the men bers, that at the death of that person, the se cret of the composition was sold for the eduring the last year, and found the result consequent on its application, perfectly as tounding! The phenomena which to long the use of it are such as will astonish the b holder, and are often deemed miraculous by cal by many of the profession. They were

spot being always directly in the neighbor od, and over the part where the disease . 2. On the continuation of the rubbing in some time, the nazing of a fluid from the a face, varying in color, the cuticle remain
